

Application Layer Protocol

```
graph TD; A[Application Layer Protocol] <--> B[Secure Session Protocol]; B <--> C[TCP/IP];
```

The diagram illustrates a three-layer architecture. At the top is a red box labeled 'Application Layer Protocol'. Below it is a green box labeled 'Secure Session Protocol'. At the bottom is a light gray box labeled 'TCP/IP'. Bidirectional arrows connect the top box to the middle box, and the middle box to the bottom box, indicating communication between all layers.

Secure Session Protocol
